30 June 2016

Investment strategy

SKAGEN Focus is a high conviction equity fund that seeks to generate long-term capital growth by investing in a portfolio of global companies across the market capitalisation spectrum, with the majority of exposure invested in small and mid-cap companies. Subscriptions are made in fund units and not directly in stocks or other securities. The benchmark reflects the fund's investment mandate. Since the fund is actively managed, the portfolio will deviate from the composition of the benchmark.

Cost information

For explanation of the overall impact of costs on the investment and expected returns please refer to the Key Information Document.

Ongoing cost: 1,60 % (Of which management fee is: 1,60 %)

Performance fee: 10,00 % (see prospectus for details)

SKAGEN Focus A

Monthly report for August as of 31/08/2026. All data in GBP unless otherwise stated.

This is a marketing communication. Please refer to the prospectus before making any final investment decisions.

Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. The fund's Key Investor Information Document and prospectus are available on www.skagenfunds.com

Last 10 years	8.91	12.19				
Since inception	8.99	12.14				

Returns over 12 months are annualised.

Risk profile (SRRI)

We have classified this product as **5 out of 7**, which is a medium-high risk class.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. A medium-high risk class rates the potential losses from future performance at a medium-high level. Other risks materially relevant to the PRIIP not included in the summary risk indicator: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk and currency risk. If the fund invests in securities in a currency other than the fund's base currency, the value is affected by changes in the exchange rate. In addition, the value of your payout may be affected if your local currency is different from the fund's currency. This product does not include any protection from future market performance so you could lose some or all of your investment.

Portfolio manager commentary, August 2026

Global equity markets continued higher in August, although performance remained uneven across regions and sectors. The fund delivered a strong month and outperformed global equity markets, driven by several stock-specific developments.

South Korean industrial conglomerate KCC, one of our largest positions, was the biggest contributor to the fund's return after presenting its value-up plan and committing to higher shareholder returns, debt reduction and operational improvements. Management also intends to monetise its Samsung C&T stake over time, which is currently worth more than KCC's entire market capitalisation.

Moroccan silver and gold producer Aya Gold & Silver delivered strong results and reached our price target. We consequently exited the position following a highly profitable journey since 2024. Brazilian

copper producer Ero Copper also reported strong numbers, reflecting improving operations and a supportive copper market. Established over recent months at a substantial discount, the position has already become a solid contributor and remains a core holding.

Aumovio was the largest detractor amid weak automotive-supplier sentiment. However, a favourable BMW settlement, significant new business wins and a shareholder-friendly payout framework have strengthened the investment case. Marcopolo also detracted following weaker-than-expected results due to an unfavourable product mix and softer exports. We believe the midterm prospects still look compelling while shares now trade at a substantial discount to normalised earnings potential.

We increased Hitachi Construction Machinery and Bangkok Bank. We exited Beazer Homes following an increased takeover bid and Peugeot Invest after the investment case failed to develop as anticipated.

Contribution last month

 Largest contributors	Weight (%)	Contribution (%)	 Largest detractors	Weight (%)	Contribution (%)
KCC Corp	3.35	0.75	Aumovio SE	3.38	-0.29
Aya Gold & Silver Inc	0.58	0.57	Marcopolo SA	1.37	-0.26

Sustainability

SKAGEN's approach to sustainability

Our ESG approach is built on four pillars. In keeping with SKAGEN's active investment philosophy, our sustainability activities centre on active engagement with our holding companies, which is where we believe we can have the greatest impact. We recognise, however, that the full potential of a sustainable investment strategy is best realised when combining the following four pillars.

- ✓ Exclusion
- ✓ Enhanced due diligence
- ✓ ESG factsheet
- ✓ Active ownership

Article 8

Sustainable Finance Disclosure Regulation (SFDR)

The product promotes environmental and social characteristics by directing its capital towards companies and issuers that meet defined ESG (environmental, social and governance) criteria. This is achieved through compliance with international norms and conventions, by taking into account negative impacts on sustainable development (PAI) and through product- or activity-based exclusions. See the prospectus for more information on the products sustainability characteristics.

IMPORTANT INFORMATION

This is a marketing communication. Except otherwise stated, the source of all information is Storebrand Asset Management AS. Statements reflect the portfolio managers viewpoint at a given time, and this viewpoint may be changed without notice.

Future fund performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future.
