01 July 2022

Investment strategy

SKAGEN Kon-Tiki is a value-based emerging markets equity fund. It seeks to generate long-term capital growth through an actively managed, high conviction portfolio of companies which are listed in, or have significant exposure to, developing markets. Subscriptions are made in fund units and not directly in stocks or other securities. The benchmark reflects the fund's investment mandate. Since the fund is actively managed, the portfolio will deviate from the composition of the benchmark.

Cost information

For explanation of the overall impact of costs on the investment and expected returns please refer to the Key Information Document.

Ongoing cost: 2,00 % (Of which management fee is: 2,00 %)

Performance fee: 10,00 % (see prospectus for details)

Historical return in GBP (net of fees)

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	YTD
Fund	30.6	21.1	-15.7	9.0	17.0	-4.4	-8.0	5.8	2.5	34.8	14.5
Index	32.6	25.4	-9.3	13.9	14.7	-1.6	-10.0	3.6	9.4	24.4	23.1

The benchmark index is the MSCI EM Index (net total return), this index did not exist at the inception of the fund and consequently the benchmark index prior to 01.01.2004 was the MSCI World AC Index.

Risk profile (SRRI)

We have classified this product as **6 out of 7**, which is the second-highest risk class.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. The second-highest risk class rates the potential losses from future performance at a high level. Other risks materially relevant to the PRIIP not included in the summary risk indicator: Event risk, liquidity risk, operational risk, counterparty risk, derivatives risk and currency risk. If the fund invests in securities in a currency other than the fund's base currency, the value is affected by changes in the exchange rate. In addition, the value of your payout may be affected if your local currency is different from the fund's currency. This product does not include any protection from future market performance so you could lose some or all of your investment.

Portfolio manager commentary, August 2026

Emerging Markets equities rebounded in August, and modestly outperformed Developed Markets driven by commodities, IT and industrials. The best-performing markets were South Africa and Turkey followed by the tech-heavy Korean and Taiwanese markets, while major economies such as India and China underperformed.

We have been surprised by the market's resilience in the face of elevated energy prices and rising long-term interest rates across most developed economies. Our defensive positioning, overweight in China and lower tech exposure explain most of the fund's underperformance during the month. Our larger Chinese holdings were the key detractors during the month. Online retailer JD.com reported quarterly results that showed continued top-line pressure from the weak market backdrop. Although non-core losses were reduced, the market remains sceptical of a turnaround while revenues remain under pressure. Market scepticism also extended to Tencent Music, which reported weaker organic membership revenues in its core business. While the threat of 'AI music' hangs over the business, we were encouraged by good cost control and the ongoing share buyback programme. Finally, Ping An's results were buoyed by strong investment gains but, like many other Chinese businesses, reported weaker top-line trends than the market was hoping for. On the positive side, Korean bank Hana Financial continued to perform strongly on the back of encouraging margins, stable asset quality and higher targets in its 'Value Up' plan. Strength in commodity prices, and copper in particular, buoyed our recently re-entered holding in Ivanhoe Mines while the relative strength in Indian financials supported Axis Bank.

We made one new investment in August. Gentera is a leading Mexican bank that works for financial inclusion by extending personal- and micro-financing in Mexico and Peru. Management has a long record of value creation, both for the bank's customers and its shareholders. The shares have de-rated recently on growing asset quality concerns in a slowing economy, but we believe that the company's strong underwriting skills and high profitability will allow it to navigate the cycle. We have long been impressed by the company's operating performance and clear mission and believe that the risk/reward is now compelling for long-term investors. We also took the opportunity to exit our residual holdings in Brazilian conglomerates Simpar and Raizen. Both have been disappointing investments due to a combination of weak operational performance and, most importantly, excessive leverage. With limited opportunity to recover our losses, we have decided to allocate resources elsewhere.

Portfolio activity remained high as market volatility presented opportunities to further adjust the portfolio. The key changes during the month were to further raise our exposure to India through our existing holdings in Axis Bank, Life Insurance Corporation of India and UPL. We also added to our Chinese internet platforms other than Alibaba on the back of recent weakness as well as our more defensive consumer staples holdings Assai, Walmex, Coca-Cola Icecek and WH Group. These additions were funded through reducing our holdings in Poland on the back of ongoing strength, as well as through a reduction in Alibaba, whose accelerated AI capex spend now exceeds its operating cash flow generation. We also made minor tweaks to TSMC and Hana Financial to comply with UCITS regulations.

At month-end, the portfolio traded at 8x 2026 earnings and 1.3x book value, compared with 12x earnings and 2.4x book value for the MSCI Emerging Markets index. While the index trades broadly in line with its long-term P/E ratio, earnings are boosted by the current (unsustainable) level of profitability in the technology sector. Relative to sales or book value, the MSCI EM index currently trades near its highest level since 2007. We therefore believe that a disciplined and cautious positioning is prudent and continue to adjust the portfolio accordingly. While these adjustments have been premature and to the detriment of the fund's relative performance, they are fully in line with our long-term and contrarian value-based investment strategy. Having foregone some of the recent market upside, we believe that the current portfolio exhibits very attractive absolute and relative value characteristics.

Sustainability

SKAGEN's approach to sustainability

Our ESG approach is built on four pillars. In keeping with SKAGEN's active investment philosophy, our sustainability activities centre on active engagement with our holding companies, which is where we believe we can have the greatest impact. We recognise, however, that the full potential of a sustainable investment strategy is best realised when combining the following four pillars.

- ✓ Exclusion
- ✓ Enhanced due diligence
- ✓ ESG factsheet
- ✓ Active ownership

Article 8

Sustainable Finance Disclosure Regulation (SFDR)

The product promotes environmental and social characteristics by directing its capital towards companies and issuers that meet defined ESG (environmental, social and governance) criteria. This is achieved through compliance with international norms and conventions, by taking into account negative impacts on sustainable development (PAI) and through product- or activity-based exclusions. See the prospectus for more information on the products sustainability characteristics.

IMPORTANT INFORMATION

This is a marketing communication. Except otherwise stated, the source of all information is Storebrand Asset Management AS. Statements reflect the portfolio managers viewpoint at a given time, and this viewpoint may be changed without notice.

Future fund performance is subject to taxation which depends on the personal situation of each investor, and which may change in the future.
